Harris Project Report Summary Sprint 7

Date	Apr. 7, 2019
Issues	28 issues

Summary

For this release our team continued to work in the 3 separate teams we had created sprint; Biometrics, Data Access API, and Chatbot. The API team focused fixing some bugs in one of the controllers and implementing Swagger support, the Biometrics team worked on integrating the demo app into the main web application, and the Chatbot team focused on getting the chatbot to fill out forms and put them into the database.

Important highlights from this release

1. API Finished

All updates for this release
